Jaeyong Ko

M.S. Student, Industrial Engineering, Seoul National University
jyko22@snu.ac.kr Homepage Google Scholar LinkedIn

Research Interests

Visual Reasoning, Unified Multimodal Model, LLM Reasoning, LLM Evaluation

Education

Seoul National University

- **M.S.** *Industrial Engineering* (Advisor: Prof. Pilsung Kang) Sep. 2025 – Aug. 2027 (Expected)
  GPA: 3.74/4.0
- **B.S.** *Industrial Engineering* Mar. 2019 – Aug. 2025
  GPA: 3.72/4.0
  Thesis: Multi-modal Financial Time-series Forecasting by Reprogramming Large Language Models

Publications

*: Equal contribution

Preprint

[1] Cliff Tokens: Analyzing Failure Trigger Tokens in LLM Mathematical Reasoning
Jaeyong Ko, Jinu Lee, Pilsung Kang, Yukyung Lee.
Preprint [project page] [paper] [github] [dataset]

Publications

[2] Oddin: Latent Visual Reasoning in Unified Multimodal Models via Self-Distillation from Image Generation
Jaeyong Ko*, Hankyeol Kim*, Pilsung Kang.
LVR @ WACV 2027 Workshop. [paper]

[1] FinLifeBench: Exhaustive Life-Event History and Financial-State Reconstruction from Longitudinal Banking Dialogue
Hangyeul Lee*, Juyoung Oh*, **Jaeyong Ko**, Sunmin Kim, Jaeik Park, Hyunkyu Kim, Jungmin Son, Pilsung Kang.
ACM ICAIF 2026. [paper]

Special Tracks

[2] Can a model think VISUALLY?
Jaeyong Ko, Eunseo Kim, Doehyeon Lee.
NeurIPS 2026 Education Track.

[1] AI Safety Lives in a Direction: Reading, Breaking, and Repairing Refusal in Multimodal Models
Doehyeon Lee, Yoo-Min Jung, **Jaeyong Ko**.
NeurIPS 2026 Education Track.

Research Experience

Research Intern

- **École Polytechnique de Montréal** (Advisor: Prof. Walid Jomaa) Apr. 2024 – Aug. 2024
  Human-centric Smart Manufacturing Workcells for Industry 5.0 applications.
- **KAIST** (Advisor: Prof. Woo Chang Kim) Dec. 2023 – Feb. 2024
  Reinforcement learning applications for goal-based wealth management.

PROJECTS

Development of Core Foundation Model and AI Agent Technology for Thermal-Process Manufacturing | *Granted by Ministry of Trade, Industry and Energy* Sep. 2026 – Present

- Designed the backbone architecture for the thermal-process foundation model and established an integrated learning framework utilizing domain data and PINN.

Duo 2.0: Evaluating LLM Reliability in Long Financial Conversations Dec. 2025 – Oct. 2026

| *Granted by KakaoBank*

- Quantified LLM capabilities in resolving ambiguous user queries using LLM-as-a-Judge methodologies.
- Designed a financial life-cycle event conversation benchmark for domain-specific conversational reliability.

Development of Advanced Integrated Monitoring Technologies for Laser Welding Jul. 2025 – Dec. 2025

| *Granted by LG Electronics*

- Designed and conducted experiments for a laser welding anomaly detection model utilizing time-series and image multimodal data.

SNU Startup Consulting Group (ACT) *President & Team Member* Mar. 2023 – Dec. 2023

- Led a student consulting group and secured four startup consulting engagements with *Moderntec*, *Designovel*, *Spring Onward*, and *Sweetspot*.
- Developed GTM strategies for *Designovel* (AI fashion-tech), *Moderntec* (EV charging infrastructure), and *Wavebridge* (cryptocurrency OTC platform).

INDUSTRY EXPERIENCE

Product Manager Intern *EXGRAM* Jul. 2022 – Oct. 2022

Planned app configurations and push notifications for the app, Veloo.

TEACHING EXPERIENCE

Peer Tutor

- Production Control, Seoul National University (406.310) Sep. 2024 – Dec. 2024
- Human Factors Engineering, Seoul National University (406.304) Sep. 2023 – Dec. 2023

HONORS & AWARDS

Master's Student Research Grant (1 year) | *National Research Foundation of Korea* 2026

- Project: Cliff Tokens: Identifying Single-Token Failure Triggers in LLM Mathematical Reasoning

Outstanding Paper Award | Poster Presentation, 2026 KDMS Summer Conference 2026

15th Lee Junghan Award (USD 2,200) | Undergraduate Academic Category 2023

3rd Place, Startup Idea Competition | *College of Engineering and College of Business, SNU* 2019

3rd Place, IE Idea Competition | *Korean Institute of Industrial Engineers* 2019

SKILLS

- **Programming and Software:** Python, R, MySQL, Docker, Git, LaTeX.
- **Languages:** Native Korean; professional working proficiency in English (TOEFL 5.0/6.0, OPIc IH).

MILITARY SERVICE

Corporal *Republic of Korea Army* Jan. 2021 – Jul. 2022

Completed full-term mandatory military service.

(Updated Oct 2026)
